DETAILED ACTION

Status of Application

1. The response filed March 13, 2009 has been received, entered and carefully considered. The response affects the instant application accordingly:
 - a. Claim 1 has been amended.
 - b. Claim 2-10 has been cancelled.
2. Claim 1 is pending in the case.
3. Claim 1 is present for examination.
4. The text of those sections of title 35.U.S. Code not included in this action can be found in the prior Office action.
5. All grounds not addressed in the action are withdrawn or moot.
6. New grounds of rejection are set forth in the current office action.

Claim Objections

7. Claim 1 is objected to because of the following informalities: the claims uses the term "a" denoting the singular, followed by the plural "compounds" which is inconsistent. It appears Applicant meant "compound". Appropriate correction is required.

Response to Arguments

8. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Zigler et al. (WO 97/26879).

Claim 2 is cancelled, the rejection is moot.

Applicant's arguments filed 3/13/2009 have been fully considered but they are not persuasive. Applicant asserts that the reference does not teach the method of

Art Unit: 1612

treating glaucoma. This is not persuasive as it is not commensurate in scope with the claim as written. Zigler et al. teaches the use of hydroxylamine compound (nitroxides) such as include TEMPOL and TEMPOL-H for the treatment of cataracts. The claim currently is for a method for treating glaucoma comprising administering to a patient suffering from an ocular disease a nitroxide containing compound or polyhydroxy acid containing compound; whereby treatment of any ocular disease such as cataracts, with a polyhydroxy acid containing compound or nitroxide containing compound such as TEMPOL and TEMPOL-H, inherently treats anyone in that population for glaucoma.

Accordingly, the rejection is maintained.

9. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Matier et al. (U.S. Pat. Pub. 2004/0002461).

Claim 2 is cancelled, the rejection is moot.

Applicant's arguments filed 3/13/2009 have been fully considered but they are not persuasive. Applicant asserts that the reference does not teach the method of treating glaucoma. This is not persuasive as it is not commensurate in scope with the claim as written. Matier et al. teaches the use of hydroxylamine compound (nitroxides) such as include TEMPOL and TEMPOL-H for the treatment of cataracts or macular degeneration. The claim currently is for a method for treating glaucoma comprising administering to a patient suffering from an ocular disease a nitroxide containing compound or polyhydroxy acid containing compound; whereby treatment of any ocular disease such as cataracts or macular degeneration, with a polyhydroxy acid containing

compound or nitroxide containing compound such as TEMPOL and TEMPOL-H, inherently treats anyone in that population for glaucoma.

Accordingly, the rejection is maintained.

Conclusion

10. Claim 1 is rejected.

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
